

BAM™ Delineator

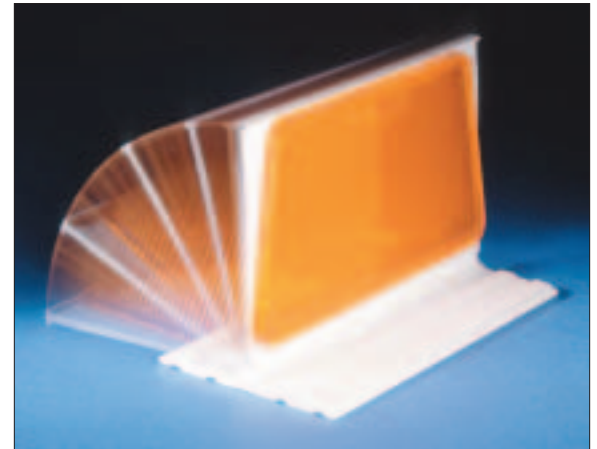

Flexible Highway Barrier Delineation

Plastic Safety
Systems, Inc.

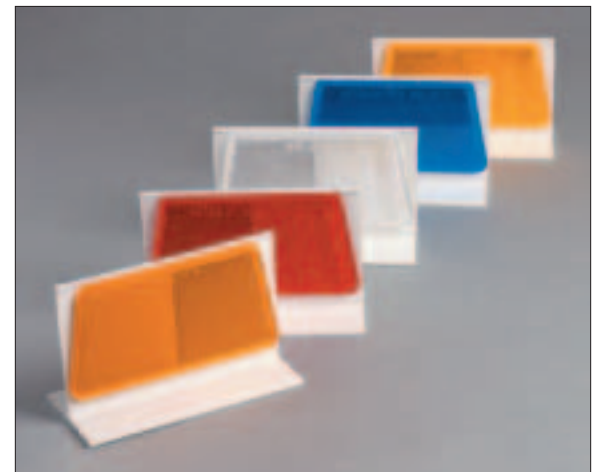

The patented BAM Delineator is constructed of a high grade plastic that has a unique hinge design that allows for maximum flex when impacted. This allows the BAM delineators to give without breaking, saving you time and money by greatly reducing the need for replacement and ensuring a safer environment for motorists.

The BAM Highway Barrier Delineator has a unique hinge design that allows for full 90 degrees of flex when impacted!

FEATURES:

- Available with acrylic reflective lens or reflective sheeting
- Sheeting provides up to 11.5 square inches of reflectivity and reflector provides 8.9 square inches of reflective area
- Base has four dovetail grooves for greater surface adhesion
- Available in standard colors - Amber, Red, Clear, Blue
- BAM markers offer the option of reflectivity on both sides of the marker as well as in two different colors
- Unique flexible hinge reduces replacements, saving time and money
- Designed for ease of installation - BAM can be glued or butyl padded to barrier surface (glue & tape sold separately)

Available in standard colors: AMBER, RED, CLEAR, BLUE.
