

MVP® Vertical Panel Barricade

USE WHEREVER CHANNELIZER SPACE IS LIMITED

Constructed of a high grade U.V. stabilized plastic

MVP serves as a channelizer to direct traffic or as a barricade to divide lanes.

Recessed panel protects sheeting. Panel can be removed for reuse.

Panel is 12" wide. Available either in 24" or 36" lengths.

Features molded foot step for easy press-fit assembly.

Molded handle provides easy transport.

We use 3M Reflective Sheeting.

Manufactured from high density polyethylene plastic with UV inhibitors.

Retroreflective sheeting meets all state and federal specifications, and is available in Engineer, Hi-Intensity and Diamond grades.

MVP rubber base weighs 45 lbs. Manufactured from 100% recycled material.

Meets MUTCD Standards for Vertical Panels!

MVP stacks easily for compact transport and storage. Accepts Type A and C warning lights.

Shown: MVP with 12" x 36" panel.
