

PSS Recommended Loading/Unloading Procedures...

Equipment Required for Loading/Unloading:

1. Fork Lift
2. Hand Truck

In the Field Unloading of Tires: Tools Required:

1. Come-A-Long
-OR-
2. Chain Hoist

- Position lift truck forks approximately 1 foot apart so that forks easily slide through center hole of bundled tires.
- Bundled tires are always shipped nearest the front of the truck on all truck load orders to maintain proper weight distribution.

Standard Truck Load Configurations:

53' Truck:

- 1100 Drums
-OR-
- 792 Drums & 704 Collars
-OR-
- 704 Drums & 914 Collars

48' Truck:

- 1012 Drums
-OR-
- 704 Drums & 704 Collars

Both Low Density & High Density Drums May Be Stacked 11 High

- Partial truck loads will always be separated by a "lock load" beam stretching horizontally across truck (wooden beam shown above) signifying end of customer order. Also, new shipping labels will be fastened to beginning of next customer's order.
